### Practical 14

**Perform basic time series analysis in Scala. Generate synthetic time series data (e.g., daily sales over a month).**

**Code :**

```
import scala.util.Random
```

```
object Demo1 extends App {
```

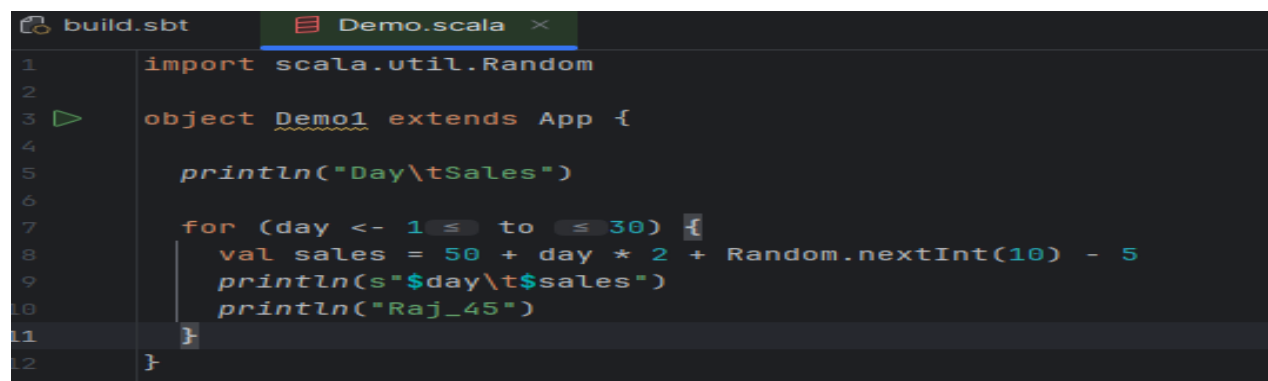

```
    println("Day\tSales")
```

```
    for (day <- 1 to 30) {
```

```
        val sales = 50 + day * 2 + Random.nextInt(10) - 5
```

```
        println(s"$day\t$sales")
```

```
    }
```

```
build.sbt  Demo.scala x
1  import scala.util.Random
2
3  object Demo1 extends App {
4
5      println("Day\tSales")
6
7      for (day <- 1 to 30) {
8          val sales = 50 + day * 2 + Random.nextInt(10) - 5
9          println(s"$day\t$sales")
10         println("Raj_45")
11     }
12 }
```

## Output :

|            |                     |
|------------|---------------------|
| "C:\Progra |                     |
| Day Sales  | 17 88               |
